

## Mechanical Vertical Lifts -Series M

Series M Lift Offers High Performance And Durability With A Proven 2-Post Mechanical Design.

Designed to transport large, heavy loads between two or more levels. Ideal for high-cycle, automated systems or frequent-use applications.

Lifts up to 8,000 lb. loads with carriage sizes up to 10' x 12'. Vertical rise to 200'. Travel speeds up to 400 fpm.

Engineered to meet your exact application and height requirements.

Carriage is lifted and lowered by heavy roller chain attached to a mechanical lifting mechanism.

Heavy-duty construction provides superior strength, reliability and long-term performance.

Built-in, advanced safety features protect workers and materials. Access gates at each level are interlocked with lift operation.

Available with patented DeckLock system that provides additional security at critical upper levels.

Offered with straddle or cantilever carriages.

Meets ANSI/ASME B20.1 code
